EDUCATION

B.Sc. Computer Science, Covenant University.

Relevant Coursework: Software Development Life Cycle, Internet Programming, Data Structures and Algorithms

TECHNICAL SKILLS

Node.js, Nest.js, React.js, Next.js, Tailwind CSS, TypeScript, JavaScript, Express.js, Git/GitHub, PostgreSQL, HTML, CSS, Python, Render, Heroku, Figma, MongoDB and API Documentation (Swagger/Postman)

WORK EXPERIENCE

Backend Engineer Resilience 17	December 2025 - Present Lagos, Nigeria
• Led cross-service error-contract standardization, eliminating fragmented error semantics and improving service-to-service reliability. • Increased resilience of card gateway integrations by improving timeout, retry, and dependency-failure handling, which reduced failed transactions during third-party instability. • Built and refined end-to-end card payment flows, from transaction initiation and gateway authorization to callback/webhook processing and final status updates. • Collaborated closely with product and QA to convert payment business rules into robust backend validations, improving feature quality and delivery predictability.	

Backend Engineer Low Gravity Limited	May 2025 – April 2026 Lagos, Nigeria
• Resolved bugs and improved endpoint accuracy, decreasing reported backend-related issues by 40%. • Built reliable integration foundations for partner systems by creating structured client and webhook data models with strong integrity rules. • Developed “recent recipient” features to help users quickly repeat transfers, improving overall product usability and transaction speed. • Supported deployments on Heroku, ensuring smooth CI/CD workflows and minimal downtime. • Implemented core functionalities for Bluecole webapp and Dashboard, enabling multi-currency transactions amongst users.	

PROJECTS

HebronBites	March 2024
• Web-based application connecting users to campus food vendors. Users can browse menus, place orders, rate vendors, and track deliveries. • Built with Node.js, Express, Sequelize, PostgreSQL, and Paystack.	

Buga Travels	July 2024
• A school ride-hailing mobile application designed to connect users with reliable drivers for safe and convenient trips to and from their various schools. • Developed with Node.js, Express, Sequelize and PostgreSQL.	

VOLUNTEERING EXPERIENCE

Backend Developer Hebron Startup Lab	November 2021 – October 2025 Covenant University, Nigeria
• Contributed to team-driven projects, emphasizing responsiveness and cross-platform compatibility. • Enhanced skills in modern backend technologies, including NodeJS, TypeScript, and JavaScript, through hands-on projects and peer learning.	
Member Google Developer Student Clubs	November 2021 – October 2025 Lagos, Nigeria
• Attended workshops and coding sessions, gaining hands-on experience in backend development. • Engaged in knowledge-sharing sessions, learning about cloud computing, machine learning, and other innovative technologies. • Networked with fellow engineers and industry professionals, expertise in modern development practices & tools.
